Instructions

Registrants may distribute or sell the products under another company's name and address instead of or in addition to their own after obtaining final registration. Such distribution and sale is termed "supplemental distribution" and the product is referred to as a "supplemental registration" or "distributor product". The distributor, also known as a "sub-registrant," is considered an agent of the registrant. Both the registrant and the distributor may be held liable for violations pertaining to the distributor product.

A Notice of Supplemental Distribution of a Registered Pesticide Product must be submitted by the basic registrant for each distributor product. The basic registration number and the distributor company number must be shown. If a potential distributor does not have a company number assigned, the registrant should have the distributor review the information at: <https://www.epa.gov/pesticide-registration/pesticide-registration-portal> (this company number and registrant office) or submit a written request on the distributor company's letterhead and mail to the address above prior to submitting this form to the agency. The completed form must have the concurrence and signatures of both the registrant and the distributor.

Specific claims may be omitted from the distributor's label provided that no other changes are necessary. 4. The product must remain in the manufacturer's unbroken container. 5. The label must bear the EPA registration number of the basic product, followed by a hyphen and the distributor's company number. 6. Distributor product labels must bear the name and address of the distributor qualified by such terms as "packed for ...", "distributed by ...", or "sold by ..." to show that the name is not that of the manufacturer. 7. All conditions of the basic registration apply equally to distributor products.
